BREAK-EVEN

23 subs

20 Yellow + 3 Blue = EUR 3,377 MRR

"EU policy professionals spend EUR 500-1,000/day on work that AI can now produce in minutes. Brubru encodes 17 years of Brussels expertise into software -- analyst-grade work at software costs."

The Problem

PAIN POINT	TIME LOST	COST
Monitoring 15+ EU sources daily	2-4 hrs/day	EUR 500-1K/day
Drafting a position paper	3-5 days	EUR 5K-15K
Compliance gap analysis	2-4 weeks	EUR 20K-50K
Understanding a new dossier's procedure	1-2 days	EUR 2K-4K
Finding relevant EU tenders	1-2 hrs/day	Missed EUR 100K+ opps

The Solution

BRUBRU FEATURE	REPLACES	TIME SAVED
My EU Bubble	Manual monitoring	80%
Document Generator	Manual drafting	90%
EU Law Comply	Compliance consultants	85%
Brubru Chat	Senior consultant Q&A	70%
Tenderator / GrantBru	Manual funding search	75%

Why Now -- Three Converging Forces

REGULATORY WAVE

AI Act, MiCA, CSRD, NIS2, DORA, Packaging Regulation -- unprecedented compliance deadlines in 2026-2028.

AI THRESHOLD

LLMs now produce analyst-grade regulatory work. For the first time, AI can draft position papers a professional would use.

MARKET VACANCY

US has FiscalNote (\$1.5B), legal AI has Harvey (\$3B+). EU policy intelligence has zero purpose-built AI platforms.

Product Suite

Five integrated modules covering the full EU advocacy workflow. Click any module to explore.

Brubru Chat

Context-aware AI policy advisor with deep EU institutional knowledge

4

AI providers (fallback chain)

18

Specialised AI services

15+

Context sources injected

CORE CAPABILITIES

- ✓ Natural language queries about EU legislation, procedures, and institutional dynamics
- ✓ Strategic advocacy guidance: who to talk to, which arguments work, how to position
- ✓ Document uploads (PDF, DOCX) for contextual analysis and summarisation
- ✓ Citation tracking with verifiable source references to official EU documents
- ✓ Multi-turn conversation memory with quality scoring
- ✓ Beresol Knowledge Bundle: 11 policy reports + 7 live monitors as context

CONTEXT SOURCES INJECTED PER QUERY

-  Legislative procedure status from OEIL (21,600+ procedures)
-  Legislative Train Schedule (490+ Commission priority files)
-  EPRS Think Tank research briefings matched by procedure reference
-  EP Committee Work in Progress (26 committees tracked)
-  EC Public Consultations from "Have Your Say" portal
-  Beresol open reports on AI Act, CBAM, Mercosur, and 8 more topics

AI PROVIDER CHAIN

- 1 Mistral** (primary) -- \$0.20/M tokens, cost-effective for all queries
- 2 Claude Sonnet** (fallback) -- \$3/M tokens, complex reasoning

3 **GPT-4 Turbo** (fallback) -- \$10/M tokens, high availability

4 **Gemini 1.5 Pro** (fallback) -- \$1.25/M tokens, last resort

My EU Bubble

Personalised intelligence dashboard -- monitor, track, predict, and generate from one place

33+

RSS feeds from EU sources

26

EP committees tracked

8

Dashboard tabs

DASHBOARD TABS

-  **News Feed** -- 33+ RSS feeds from EP, Commission, Council, EPRS, OEIL, and general EU news
-  **Legislative Train** -- 490+ priority files from the Commission's work programme with status tracking
-  **My Files** -- Tracked legislation, saved entries, bookmarked collections
-  **Committee Work** -- Work-in-progress procedures across 26 EP committees (COD, APP, CNS, NLE, INI)
-  **EC Consultations** -- Open, closed, and outcome-published consultations from "Have Your Say" portal
-  **Analytics** -- Reading patterns, topic interests, engagement metrics

CORE CAPABILITIES

- ✓ Subscribe/unsubscribe from any RSS feed based on policy interests
- ✓ Track/untrack legislative files, committee work items, and consultations
- ✓ Filter by category, source, date, committee code, or procedure type
- ✓ Stage pipeline visualisation for legislative progress (announced > adopted)
- ✓ Configurable email alerts for tracked items

INTEGRATED SUB-MODULES

Document Generator

AI-powered advocacy documents through a step-by-step wizard. Produces **position papers** (executive summary, background, key asks, recommendations), **MEP briefings** (optimised for busy MEPs with clear asks and voting recommendations), and **talking points** (bullet-format for meetings). Link to EU legislation via CELEX numbers, add policy areas, identify stakeholders. Minutes instead of days.

Predictions Engine

AI legislative forecasting with 11 backend services. **Timeline prediction** (survival analysis on historical durations), **outcome prediction** (multi-feature analysis of procedure, committee, political dynamics), **EP plenary vote forecast** (9 political groups, 720 MEPs), **Council vote** (QMV calculator, 27 member states, blocking minority detection -- Blue tier), **resolution leading indicators** (INL/INI/RSP resolutions that preceded legislation). Yellow: 10/month. Blue: unlimited.

RSS SOURCE CATEGORIES

-  European Parliament (committee feeds, plenary, press releases)
-  European Commission (DG-specific publications and speeches)
-  Council of the EU (positions, working group outputs)
-  OEIL Legislative Observatory (procedure updates)
-  EPRS Think Tank (research briefings and studies)
-  General EU news (EurActiv, Politico Europe, etc.)

Amendator

XML-first legislative amendment editor modelled on the European Parliament's AT4AM system

XML

Akoma Ntoso compliant

4

Export formats

3

Workflow statuses

HOW IT WORKS

- ① Load any EU legislative text via EUR-Lex CELEX number or URL
- ② Two-column layout displays original text alongside your proposed changes

- ③ Click on any article, paragraph, recital, or annex to propose an amendment
- ④ AI drafting: describe changes in natural language, Brubru produces legal text
- ⑤ Track changes visualisation: **bold** for additions, ~~strikethrough~~ for deletions
- ⑥ Export in XML, HTML, PDF, or Word format

AMENDMENT WORKFLOW

- **Candidate** -- Draft amendment, still being refined
- ✓ **Tabled** -- Officially submitted for consideration
- ✗ **Withdrawn** -- Pulled from consideration

TECHNICAL COMPLIANCE

- ✓ **Akoma Ntoso XML** -- OASIS LegalDocumentML standard used by EU institutions
- ✓ Automatic position references (Article X, paragraph Y, point (a))
- ✓ Handles both OJ (Official Journal) and COM (Commission) document formats
- ✓ Supports recitals, articles, annexes, and transitional provisions
- ✓ Link amendments to Legislative Train carriages for tracking

WHY IT MATTERS

- ⚠ Legislative formatting is arcane -- get it wrong and amendments are rejected on procedural grounds
- ⚠ No other tool combines AT4AM-style editing with AI drafting assistance
- ⚠ EP's own AT4AM is internal-only -- not available to external stakeholders who draft amendments for MEPs

TIER ACCESS

- **White:** 5 amendments per month, XML + HTML export, watermark
- **Yellow:** Unlimited amendments, all export formats, no watermark
- **Blue:** Everything + white-label export support

EU Law Comply

Automated compliance gap analysis against EU regulations with severity-rated action plans

0-100%

Compliance scoring

4

Report export formats

2-phase

Semantic + LLM analysis

HOW IT WORKS

- 1 Upload organisational documents (PDF, DOCX, or TXT)
- 2 Select relevant EU law clusters (AI Act, GDPR, NIS2, CSRD, MiCA, DORA, etc.)
- 3 AI extracts text and identifies regulatory requirements using HuggingFace ML models
- 4 Two-phase gap analysis: semantic search matches requirements, then LLM refines findings
- 5 Receive gap analysis with severity ratings: missing, partial, unclear, or compliant
- 6 Export detailed report with action plan timeline (PDF, Word, HTML, JSON)

LAW CLUSTERS AVAILABLE

- ✓ AI Act (2024/1689) -- Risk classification, conformity, transparency
- ✓ GDPR -- Data protection, DPO requirements, transfers
- ✓ NIS2 -- Cybersecurity risk management, incident reporting
- ✓ CSRD -- Corporate sustainability reporting
- ✓ MiCA -- Crypto-asset regulation
- ✓ DORA -- Digital operational resilience (financial services)

REPORT CONTENTS

- Overall compliance score** (0-100%) with colour-coded indicator
- Gap summary** -- count of missing, partial, unclear, and compliant items
- Detailed findings** per requirement with severity rating and evidence
- Recommended actions** prioritised by criticality and deadline
- Action plan timeline** with visual Gantt-style prioritisation

Usage history -- track compliance improvements over time

MARKET CONTEXT

- Traditional compliance assessments cost EUR 20,000-50,000 and take 2-4 weeks
- Brubru produces a first-pass analysis in minutes at a fraction of the cost
- Unprecedented wave of compliance deadlines (AI Act, NIS2, DORA) in 2025-2027

TIER ACCESS

- White:** Not available -- upgrade trigger
- Yellow:** Limited analyses per month
- Blue:** Full access, unlimited analyses, priority processing

Tenderator / GrantBru

AI-powered EU funding and procurement intelligence -- Blue tier exclusive

800K+

TED notices per year

6

ML-powered services

SPARQL

Market analytics engine

CORE FEATURES

- Organisation Profile** -- Set up CPV codes, geographic preferences, capacity, and past experience
- AI-Matched Feed** -- Tenders scored by relevance to your profile, updated daily from TED
- SME Suitability Scoring** -- Multi-criteria weighted analysis of your fit for each tender
- Bid Checklist** -- Auto-generated checklist of requirements, eligibility criteria, and deadlines
- Tender Calendar** -- Visual calendar of submission deadlines across all tracked tenders
- Tender Detail** -- Full notice with AI-extracted requirements, estimated value, and award criteria

DATA SOURCES

-  **TED (Tenders Electronic Daily)** -- Official EU procurement database via SPARQL + eForms API
-  **eForms XML** -- Structured procurement notices with CPV codes, lots, and award criteria
-  **eCertis** -- Procurement criteria across 27 EU member states

AI/ML SERVICES (HUGGINGFACE)

-  **Tender Classifier** -- Categorise tenders by sector, type, and complexity
-  **Tender Summariser** -- Compress multi-page notices into actionable summaries
-  **Tender Search** -- Full-text semantic search across all indexed notices
-  **SME Analyser** -- Assess small business suitability against tender requirements
-  **Requirement Extractor** -- Pull eligibility and technical requirements from notices
-  **Award Explainer** -- Interpret award criteria weighting and evaluation methodology

MARKET ANALYTICS (SPARQL)

-  Procurement spending trends by sector, geography, and contracting authority
-  Award history analysis for competitive intelligence
-  Geographic distribution of opportunities matching your profile

GRANTBRU EVOLUTION (2027)

-  **All EU Funding** -- Expand from procurement to cover Horizon Europe, Digital Europe, CEF, LIFE, Erasmus+, AGRIP, EIC, EIB/EIF, Structural Funds, Recovery & Resilience Facility
-  **National Schemes** -- Member State co-financing, national subsidies, regional development funds
-  **AI Grant Matching** -- Organisation profiling against all EU and national funding programmes

WHY BLUE TIER EXCLUSIVE

-  Tenderator / GrantBru is the primary upgrade trigger from Yellow to Blue
-  Higher compute cost per user (ML inference + SPARQL queries)
-  Enterprise-grade feature justifying EUR 599/month positioning

DATABASE MODELS

25+

15 migrations applied

 Tech Stack

LAYER	TECHNOLOGY	WHY
Frontend	React 18 + TypeScript + Vite 7	Modern, fast, typed
Backend	FastAPI + SQLAlchemy 2.0	Async, ideal for AI
Database	PostgreSQL 15+ (Supabase)	Relational + JSONB
AI (primary)	Mistral small-latest	15x cheaper than Claude
Search	BM25 + Semantic (hybrid)	Best of both worlds
Vector DB	ChromaDB	Lightweight, sufficient
ML	HuggingFace	Open-source, no API lock-in
Payments	Stripe	Industry standard

 AI Provider Chain

#	PROVIDER	COST/M INPUT	USE
1	Mistral	\$0.20	Default (all requests)
2	Claude Sonnet	\$3.00	Complex reasoning
3	GPT-4 Turbo	\$10.00	High availability
4	Gemini 1.5 Pro	\$1.25	Last resort

🕒 Mistral is 15x cheaper than Claude with comparable quality for EU policy questions.
